About Antelco

Antelco Group of Companies

Antelco promotes a “quality” culture throughout the company, reflected in all facets of the organisation, including customer service, sales and marketing, ordering, manufacture, and delivery. This culture has seen the Antelco Group expand, pairing with companies that share its drive for quality.

The Antelco Group includes Lincoln Plastics, a leading toolmaking and plastic injection moulding company based in Adelaide, South Australia, and Dawn Industries, worldwide leaders in the design, manufacture, and distribution of high performance water system components, tools, and replacement products for system professionals.

Micro Irrigation Experts

Antelco produces quality irrigation products for home owners, landscapers and agricultural markets to promote responsible water use worldwide.

Experienced engineers, product designers and marketers, with a wealth of industry knowledge, create quality and cost-effective micro irrigation products. All products undergo rigorous field testing and quality control measures so that any faults or imperfections can be engineered out, resulting in a fault-free, quality product worthy of the Antelco name.

Putting Water Where it Counts!®

Shrubbler® 360° & 180° Adjustable Flow

The original Shrubbler® with flow adjustment. Flow and coverage can be altered by rotating the click indexed cap.

Features

- Fingertip flow control with shut-off option.
- Spike models anchor Shrubbler® at the plant.
- In-Line Spike and Spike model suits 0.16" ID micro tube.
- Barb model for direct attachment to feeder and supply tubes.
- 10-32 UNF threaded model for installation into Rigid Risers, Asta® Stake Adapters and Micro Stakes.
- 1/2" threaded model for riser pipe installations.

PotStream® Adjustable Flow

The PotStream® is a patented side mounted watering solution for pot plants and containers. The adjustable gentle stream pattern minimizes soil erosion and the variable flow rate and pattern radius allows for use in various pot sizes.

Features

- Variable flow rate and pattern size suits pot diameter of 8" and upwards.
- Suits pot wall thickness up to 1.6".
- Side mounted installation for neat location of the supply tube.
- Shut-off feature allows easy relocation of pots and containers.
- Low application rate and gentle stream pattern.
- Easily adjustable knob for varying spray patterns.
- Patented design (US Design patent D815,929).

Agri Drip™ Classic Emitter

A sealed turbulent flow path dripper that provides consistent and uniform performance at an economical price.

Features

- Color coded bases for easy identification: 1/2 gph (Red), 1 gph (Gray) & 2 gph (Green).
- Positive barb connection to suit 0.16" ID tube.
- UV stabilized materials for long life.
- Resistant to common agricultural chemicals and fertilizers.
- Suitable for rainwater tanks and low pressure systems.

Applications

Economical dripper for landscape, horticultural tree and row crops and vineyards.

Agri Drip™ Classic 1 gph

Agri Drip™ Classic 2 gph

Agri Drip™ Pressure Compensating Emitter

A sealed turbulent flow path pressure compensating dripper incorporating a diaphragm that maintains a uniform flow rate over a wide range of operating pressures.

Features

- Three available models: 1/2 gph, 1 gph & 2 gph.
- Positive barb connection to suit 0.16" ID tube or connect directly to supply tubing.
- UV stabilized materials for long life.
- Resistant to common agricultural chemicals & fertilizers.

Applications

Horticultural tree and row crops, vineyards and landscape applications.

SPEC Drip™ Pressure Compensating Emitter

NEW

A dripper with a self-piercing inlet barb for easy installation and a barbed outlet for secure connection of 0.160" ID offtake tubing. The sealed turbulent flow path and diaphragm ensure uniform flow rates across a wide pressure range.

Features

- Self piercing inlet barb with color coded bases.
- Self-flushing cleaning action at low pressures.
- Insect baffle to reduce risk of blockages.
- Inlet barb has built-in filter.
- UV stabilized materials for long life.
- Resistant to common agricultural chemicals & fertilisers.
- Antelco Drip Mate® Tool aids installation without pre-piercing.
- Low manufacturing variation (Cv) to provide high performance (ISO 9261).

Applications

Vineyards, orchards, row crops and landscape.

CETA® Pressure Compensating Emitter

A take apart pressure compensating dripper incorporating a turbulent flow path and diaphragm for uniform flow rates over a wide range of operating pressures.

Features

- Low manufacturing coefficient of variation (Cv) provides high performance (conforms to ISO 9261).
- Take apart for easy inspection and cleaning.
- Self-flushing cleaning action at low pressure.
- Insect baffle to minimize risk of blockages.
- Barbed Outlet range includes either 0.12" or 0.16" barbed outlets.
- Spike & In-Line Spike models to anchor CETA® at the plant.

Applications

Pots, planter boxes, balcony patio and landscape applications.

CETA® Pressure Compensating Emitter

A take apart pressure compensating dripper incorporating a turbulent flow path and diaphragm for uniform flow rates over a wide range of operating pressures.

Features

- Low manufacturing coefficient of variation (Cv) provides high performance (conforms to ISO 9261).
- Three color coded flow rates: 1/2 gph (Red), 1 gph (Black) & 2 gph (Green).
- Large clog resistant turbulent flow path.
- The CETA® dripper is able to be taken apart for inspection and cleaning.
- Anti-insect baffle to deter insect entry.
- Constructed of high quality UV and chemical resistant materials.

Applications

Vineyards, orchards, row crops and landscape.

Shrubbler® 360° Pressure Compensating

A patented pressure compensating drip emitter that provides a fixed diameter over a wide range of operating pressures. Gentle stream action with uniform application and coverage for all emitters on the same supply tube.

Features

- Pressure compensating operation maintains diameter of throw over a wide range of inlet pressures.
- Take apart for easy inspection and cleaning.
- Colored cap for easy identification.
- Patented (US Patent 8662414) functionality.
- UV stabilized materials for long life.

Pinch Drip™ Pressure Compensating Emitter

A sealed turbulent flow path pressure compensating dripper incorporating a diaphragm to maintain uniform flow rates over a wide range of operating pressures. Finger grips for ease of installation.

Features

- Low manufacturing coefficient of variation (Cv) to provide high performance (conforms to ISO 9261).
- Color coded bases.
- Self-flushing cleaning action at low pressures.
- Insect baffle to minimize blockages.
- Inlet barb has built-in filter.
- UV stabilized materials for long life.
- New Drip Mate® Tool aids installation (see page 67).

NEW

Applications

Vineyards, orchards, row crops and landscape applications.

Spectrum™ 360° Adjustable Spray

An adjustable flow, full circle vortex sprayer with fine water droplets. Flow and coverage can be altered by rotating the click indexed cap.

Features

- Fingertip click indexed flow control with shut-off option.
- Spike model to anchor Spectrum™ at the plant.
- 0.16" Barb model for direct attachment to feeder and supply lines.
- 10-32 UNF threaded model for installation into Asta® Stakes, Asta® Stake Adapter, Micro Stake Assembly and Rigid Risers.
- 1/2" threaded model for riser pipe installations.

Applications

Pots, tubs, ground cover, landscaped gardens and nurseries. Waters large garden areas when used with Asta® Stakes and Risers.

Micro Sprays: Caps & Bases

A large variety of flow rates and spray patterns are achievable when the range of caps and bases are assembled into two piece jets.

Features

- Caps available in eight spray patterns.
- Color coded bases.
- Jet assemblies made to order.
- Caps and bases can be ordered separately.
- Available in 10-32 UNF thread Hexagon Base.

Micro Sprays: Assembled

Two piece jets with precise watering patterns. Effective performance from low pressure.

Features

- Nine optional spray patterns.
- Color coded bases for flow identification.
- Caps feature a snap ring which firmly engages the base.
- Threaded for installation of Asta® Stakes, Asta® Stake Adapter, Micro Stake Assemblies and Rigid Risers.
- UV stabilized materials for long life.

Applications

Landscape areas, home gardens, nurseries and horticultural applications. Mist Jet ideal for greenhouse misting and hanging baskets. Strip Spray ideal for narrow garden beds.

Accessories: Asta® Stake, Rigid Riser and Micro Stake.

CFd™ DownSpray

The patented CFd™ DownSpray is a 360° spray jet that distributes water evenly across the wetted surface area. Stake assembly options provide savings in labor and installation time.

Features

- 45° downspray reduces the effect of wind.
- Gentle spray pattern minimizes damage to delicate plant foliage.
- 45° downspray pattern gives consistent pattern diameter with different inlet pressures making CFd™ ideal for pot watering.
- Six color coded frames to identify flow rates.
- “Quick” thread for easy insertion into tubing.
- Galvanized wire stake assembly with 36” tubing incorporates shut-off clip to stop flow.
- Patented (US patent 8480013) design provides uniform water application.
- UV stabilized materials for long life.
- Diameter of spray pattern can be easily adjusted by raising or lowering the emitter height.
- Stake assemblies includes self piercing adapter for easy installation into lateral tubing.

CFd™ DownSpray Range

CFa AgSpray™

A high performance 360° 12-stream Hi-Lo open spray jet designed for agricultural irrigation systems. C-Frame with no moving parts for long life in harsh conditions.

Features

- Color coded for flow rate identification.
- 26° High x 12.5° Low Trajectory
- Robust proven C Frame design.
- No moving parts.
- Stake assemblies includes self piercing adapter for easy installation into lateral tubing.
- “Quick” thread inlet with sealing barb.
- Threaded for installation on Asta® Stakes, Asta® Stake Adapters, Micro Stake Assemblies and Rigid Risers.
- UV stabilized materials for long life.

Frame Jets™

Low maintenance open spray jets which excel in performance and reliability. Deflector snaps on to frame to temporarily restrict spray diameter for young trees.

Features

- Open frame and spray plate.
- No moving parts.
- Wide range of spray patterns and trajectories.
- Color coded nozzles for flow rate identification.
- “Quick” thread for easy insertion into tubing.
- Threaded for installation on Asta® Stakes, Asta® Stake Adapter, Micro Stake
- Assemblies and Rigid Risers.

Applications

Specifically designed for orchards, vineyards and horticultural crops.

Rotor Spray™ Mini Sprinklers

Durable and reliable with excellent distribution uniformity. Vari-Rotor Spray™ can be adjusted to alter flow and coverage.

Features

- 'C' Frame design for uniform distribution.
- Rotor Spray™ has a 19° trajectory and Inverted Rotor Spray™ has a -19° trajectory when installed in an inverted position.
- Full flow flipper suspended between two bearings for reliable performance.
- Inverted model incorporates khaki colored flipper with dust cover to protect bearing.
- Six color coded nozzles to identify flow rates.
- 10-32 UNF thread for installing into Rigid Risers, tubing & 1/2" threaded adapters.
- UV stabilized materials for long life.

Applications

Landscape areas, home gardens, nurseries, and horticultural applications. Inverted Rotor Spray™ ideal for overhead greenhouse and nursery watering.

Rotor Rain™ Mini Sprinklers

Low trajectory larger droplet mini sprinkler available in a range of flow rates.

Features

- 'C' Frame design for high distribution uniformity.
- 23° trajectory
- Full flow spinner suspended between two bearings for reliable performance.
- Color coded nozzles to identify flow rates.
- Rotor can be replaced with break-off spray deflector for close-in watering of immature trees.
- UV stabilized materials for long life.

ACTUAL SIZE

Rotor Rain™
1/2" Male Thread

Applications

Vines, bananas and tree crops such as citrus and apples.

Rotor Rain™ Plus Mini Sprinkler

A high performance and featured range of mini sprinklers with a profiled double frame to maximise water distribution.

Features

- Anti-insect spinner design.
- Easy turn field disassembly.
- Color coded flow rates.
- Quick action frame removal for ease of field disassembly.
- 21° trajectory
- Long field life bearing and spinner.
- Standard or Deflector spinner for close in watering of young trees.
- Suspension hole for trellis applications.
- Available in 3/8" or 1/2" male threaded inlets.

Applications

Orchards, row crops, smaller vegetable plots, greenhouses and nurseries.

Rotor Rain™ *Plus* Pressure Compensating

The Rotor Rain™ *Plus* Pressure Compensating sprinkler provides even sprinkler performance for all sprinklers on the same lateral line over long rows and on undulating terrain, delivering a more even application of water, fertilizers and chemicals through each sprinkler

Features

- Pressure compensating for consistent output with varying inlet pressures.
- Aerofoil frame profile for strength and distribution uniformity.
- Snap-off deflector option for young trees.
- 21° trajectory
- Suspension hole for trellis applications
- Color coded bases for easy flow rate identification.
- Easily disassembled for in-field maintenance.
- High grade silicone diaphragm for long service life.

Applications

Orchards and row crops where input pressure varies or terrain is undulating.

Rotor Max™ Midi Sprinklers

Robust and reliable “spinner” sprinkler for use above and below plant foliage and with two trajectory options. Excellent sprinkler distribution patterns and performance.

Features

- Dual outlet spinner enhances performance.
- Standard model has a 25° trajectory with black colored spinner.
- Inverted model has a 0° flat trajectory with khaki colored spinner.
- Suitable for recycled water applications subject to adequate filtration.
- Easily taken apart for servicing.
- UV stabilized materials for long life.

Rotor Max™ Deflector

- Easy snap-on field fitted 180° Deflector.
- Directional ribs distribute the water evenly over the 180° pattern.
- Water is redirected by the cupped spray plate providing improved application uniformity over flat plate deflectors.

Applications

Greenhouses, vegetable row crops and under tree watering. **Accessory - Rotor Max™ Deflector:** Part circle operation for road edges, driveways and end of sprinkler rows.

Deflector 180°	21365	10	28	10.6

1

Align deflector vertically above sprinkler frame

2

Slide one clip over edge of frame

4

Ensure clips are fully engaged on both sides

3

Push down on top of other clip until deflector locks into place

Rotor Max™ 180° Deflector

Rotor Max™ has been independently tested by the Australian Irrigation Technology Centre, Report No. A95003.

Sprinkler Accessories

A range of accessories to install Rotor Rain™, and other industry standard 3/8" threaded micro sprinklers.

Sprinkler Adapter

Perfect for suspended trellis wire installations, this adapter comes in 5 mm, 10 mm, and 13 mm barb sizes.

Rotor Stake™

Rotor Stake™ is designed for securing 3/8" threaded micro mini sprinklers. The stake includes a retaining hole to keep tube firmly in place near the stake. The tube piercing point allows for hole punch installation.

Rod Stake Sprinkler Adapter

Ideal for 0.2" (5 mm) OD fibreglass or steel rod applications, available in 5 mm and 10 mm barb sizes.

Collar Pipe Sprinkler Adapter

Designed for 1.0" OD uPVC or Galvanized riser installations (26.7 mm OD), this adapter is available in 5 mm, 10 mm, and 13 mm barb sizes.

Rotor Rain™ Plus Socket Driver

Using a low speed torque controlled drill, simply slip the aluminium Socket Driver over sprinkler heads for easy installation into threaded stakes and risers.

Green Back® Valves

On/off device to control the water flow in low pressure irrigation systems.

Features

- Simple quarter turn operation and straight through flow.
- Operating range up to 45 psi.
- Green Back® cap for standard irrigation applications.
- Purple Back™ lilac cap easily identifies recycled water - not for human consumption.

Applications

End of line flushing and manual on/ off flow control of submain and lateral lines. Vineyards, orchards, nurseries, greenhouses, landscaping and home gardens.

eZyvalve4™

A compact valve box with 4 internal solenoid valves available in models to suit either 24 Vac or 9 Vdc latching irrigation controller. The eZyvalve4™ provides a trouble-free way to distribute water to micro irrigation systems and small to medium lawn areas.

Features

- Pre-assembled with no internal pipe connections.
- High strength UV stabilized materials.
- Includes cable seal and wire connectors.
- Water, dust and pest resistant.
- Textured non slip lid with o-ring seal and stainless steel screws.
- 3/4" MNPT threaded inlet and outlet connections.
- Patented (US patent 9936653) functionality.

Applications

Landscape, home gardens, greenhouses and nurseries. Above and below ground installation.

eZyvalve4™ - 24Vac

The eZyvalve4™ comes pre-assembled with no internal pipe connections for fast and easy DIY installation and is made from high strength UV stabilized materials.

The 24Vac model requires connection to a 24Vac irrigation controller.

Operating Specifications - 24Vac

FLOW	0.25 gpm - 8 gpm
PRESSURE	24 Vac
AMBIENT TEMPERATURE	35°F - 140°F
ELECTRICAL	24 Vac, inrush current 291 mA, holding current 237 mA at 60 Hz

eZyvalve4™ - 9Vdc

The eZyvalve4™ is a compact valve box with 4 internal solenoid valves designed to provide a trouble-free way to distribute water to a micro irrigation system. The 9Vdc model requires connection to a 4 station battery powered DC irrigation controller.

For non-potable water supply, a filtration device is recommended. Contact your local irrigation contractor / supplier for further advice.

When designing your irrigation system, refer to your local building codes for plumbing and electrical requirements.

Operating Specifications

FLOW	0.25 gpm - 8 gpm	7 psi - 108 psi
PRESSURE	9 Vdc	35°F - 140°F
AMBIENT TEMPERATURE		9 Vdc, inrush current 1200 mA
ELECTRICAL	9 Vdc	

Pressure Regulating Devices

A range of low, medium, and high flow pressure regulators designed to stabilize outlet pressure and optimize emitter performance.

Features

Pressure Regulators:

- Available in 3 flow options: Low Flow, Low to Medium & High Flow
- High-strength, chemical-resistant ABS construction for durability.
- Stainless steel spring for long wear.
- Low to Medium Flow regulators have minimal moving parts and a pressure protection mechanism to respond to system back pressure.
- High Flow regulators withstand higher flows with sturdy EPDM diaphragm construction.

Applications

Reducing mains pressure to optimum micro irrigation operating pressure.

Hose Bibb Vacuum Breaker:

- Corrosion-resistant vacuum breaker prevents back siphonage through the exterior hose bibb connection.
- High-strength, glass reinforced Zytel®.
- Operating pressure up to 125 psi.

NEW

Hose Bibb Vacuum Breaker

CONNECTION TYPE		INLET 3/4" FNPT OUTLET 3/4" MNPT	INLET 1" FNPT OUTLET 1" FNPT
CONNECTION TYPE		INLET 3/4" FHT OUTLET 3/4" FHT	

Installation

- The Pressure Regulators must always be installed downstream from all shut-off valves, regardless of the application.
- Regulators should be installed with the vent hole unobstructed.
- Do not use sealing compound (solvent cement). If needed, teflon tape may be used to seal for leaks.

Micro Fittings

Essential components for low-pressure micro irrigation systems, used in conjunction with standard low-pressure tubing.

Features

- Micro fittings with single barb or "Quick" thread connection.
- 1/2" MNPT and FNPT Adapters suit (0.16") 10-32 UNF or "Quick" thread emitters.
- UV stabilized materials for long life.

NEW

Applications

Home gardens, landscaping, aquariums, greenhouses and hanging baskets.

Micro Fittings

Essential components for low-pressure micro irrigation systems, used in conjunction with standard low-pressure tubing.

Features

- Tidy Bow™ Clip On Elbow clips over 1/4" micro tubing removing the need for cutting tube and additional micro fittings. Redirects tubing without kinking tube or flow restriction
- Ratchet Clamps secure LDPE tubing to barbed fittings.
- Saddle Clips and Clamps secure 1/4" micro tubing.
- Goof Plugs repair holes in LDPE tubing.
- UV stabilized materials for long life.

Applications

Home gardens, landscaping, greenhouses and hanging baskets.

Xpando™ Take-Off Director

Threaded Xpando™ Take-Off Directors allow direct connection of threaded sprinkler risers to HDPE and uPVC lateral pipework.

Features

- Xpando™ Take-Off Director features a collapsible barb that prevents pullout and minimises grommet damage during installation.
- 1/2" BSPM thread connection for riser.
- Large 19 mm Take-Off provides minimal friction losses.
- Capo™ Grommet with internal step combines with Xpando™ interference barb to hold off-take firmly in place.
- Use precision 19 mm Xpando™ Drill Bit to create clean round holes of the correct size to ensure reliable sealing.

Applications

Agricultural, horticultural, vineyard and landscape applications.

Xpando™ Take-Off Fittings

Antelco Xpando™ Take-Off Fittings are a proven method of connecting low pressure irrigation tubes and driplines to polyethylene (HDPE) tubes and PVC mainlines (class 200 or 160 only).

Features

- Easy installation saves time and costs.
- Innovative Xpando™ Take-Off Adapter with collapsible barb prevents pull-out and reduces grommet damage during installation process.
- Capo™ Grommet with internal step combines with Xpando™ interference barb to hold take-off firmly in place.
- UV stabilized materials for long life.

Applications

Agricultural, horticultural, vineyard and landscape applications.

Double Barb DB Fittings™

The DB range of purpose designed quality acetal fittings provides high retention in low pressure poly (LDPE) tubing for long-term reliability of connections.

Features

- Sharp edged barbs create reliable sealing.
- Engineering grade UV stabilized acetal plastic for increased strength and long service life.
- Operating pressure range up to 50 psi.
- The space between double barbs allows placement of Antelco Ratchet Clamp's for extra security.

Applications

Low pressure micro irrigation systems.

Tap Fittings

A range of quick connect fittings specifically to connect low density poly irrigation tubing. Connect to faucet adapters, faucet timers, manifold and multi outlet distributors.

Features

- Simple to use ergonomic design.
- Tap Adapter suits Snap-On connections.
- UV stabilized materials for long life.

Applications

Home gardens and landscaping applications.

Filters

Filtration devices to trap foreign particles in the water and reduce risk of clogging of emitters.

Features

- In-Line model with single barb inlet and outlet.
- Snap-On model for direct connection to standard tap adapters.
- 80 mesh screen filter.
- Easily taken apart for cleaning.
- Effective compact filters with minimal flow losses.

In-Line Filter

Snap-On Filter

In-Line Filter screen detail

Applications

For low pressure (up to 45 psi) micro irrigation systems.

Rigid Risers

Rigid Risers are used throughout a micro irrigation system in conjunction with emitters and fittings.

Features

- Available in four lengths - 6", 8", 12" and 18" in plain, barbed, threaded or 1/2" MNPT configurations.
- HDPE (HD) Risers suit all 10-32 UNF threaded emission devices including Shrubbler®, Bubbler, Spectrum™, Vari-Jets™, Jets and Rotor Spray™.
- Can be used in combination with Asta® Stakes or assembled with 1/2" MNPT adapter.
- Dimensions 0.160 ID x 0.300 OD.
- Operating pressure up to 50 psi.

Applications

Provides height extension to emitters in micro irrigation systems.

Stakes

The Asta® Stake range offers a simple solution for the various spray heights required in landscape and home gardens.

Features

- Asta® Stakes come in four sizes, ranging from 8" to 21". The 16" and 21" options offer added stability and extra height.
- Suitable for use with flexible vinyl take-off tube for optimum versatility.
- Fits all .272" OD vinyl tubing or .300" PE Rigid Riser.
- Asta® Stake Adapter adapts 1/4" tubing to 10-32 UNF threaded emitters and clips into Asta® Stakes.
- Asta® Clip Stake anchors micro tubing.
- Asta® Hold-Down Stake anchors tubing.
- UV stabilized materials for long life.

Applications

Agricultural, landscape and home garden applications.

Stake Assemblies

Complete assemblies available for time saving convenience.

Features

- Pre-assembled with Rigid Risers or vinyl tubing for ease of installation.
- Adjustable control with Vari-Jet™ Asta® Stake Assembly.
- Micro Stake has a tube piercing point for hole punch installation of 1/4" adapters on micro tube and a retainer hole to align and support micro tubing.
- UV stabilized materials for long life.

Applications

Flowers and vegetable gardens and micro spray installations.

DripMate® Micro Irrigation Kits

The DripMate® Kits come complete with instructions and all of the essential micro drip components needed to install an efficient drip irrigation system.

Features

- Kits connect directly to a hose faucet or can be adapted to an existing sprinkler system.
- The Sprinkler Conversion Kit converts an existing 1/2" irrigation riser to drip irrigation.
- Minimal assembly required for maximum efficiency.
- Instructions provided for easy installation.
- UV stabilized materials for long life.

Applications

Home and landscaped gardens, container plants, nurseries and flower beds.

DripMate® Starter Kit

- 9-Outlet Pressure Regulating Micro Manifold w/plugs
- 100 feet of 1/4" Distribution Tubing
- 9 Shrubbler® 360 Spike Adjustable Flow

DripMate® Sprinkler Conversion Kit

Installation Tools

Tools to assist in the installation of micro irrigation systems.

Features

- 2 in 1 Punch & Cutter suitable for cutting CVT and LDPE tubing up to 3/4" OD and punching holes into 1/2" and 3/4" LDPE for the installation of Drippers, Sprays, Rigid Risers and micro fittings.
- Miracle Punch makes 0.18" hole in 1/2" to 3/4" LDPE tubing.
- Socket Driver is an aluminum assembly tool for quick and easy installation of Rotor Rain™ Plus and Rotor Rain™ sprinklers into stakes and risers.
- Key Punch™ makes 0.12" hole in tubing and has a hexagonal base to install and remove spray jets and interchange their caps.

Applications

Suitable for all micro irrigation applications.

Socket Driver for Rotor Rain™ Plus

Socket Driver for Rotor Rain™ Plus

Using a low speed torque controlled drill, simply slip Socket Driver over sprinkler head for easy installation into stakes and risers.

2 in 1 Punch & Cutter

Cuts low density poly pipe and vinyl tubing up to 22 mm OD.

Punches holes into tubing ready for the insertion of emitters and fittings.

Miracle Punch

Hole Punch 7.5 mm

Key Punch™

DripMate® Tool

The Antelco DripMate® Tool is a versatile micro irrigation tool designed to simplify the installation of a variety of Antelco emitters. The DripMate® Tool also serves as a handy emitter removal tool for effortless maintenance.

Features

- Holds self piercing joiners to connect micro tubing and grips and supports joiner/tube assembly for insertion into laterals.
- Compatible with a wide range of Antelco drippers and emitters for easy installation.
- Hole punch for creating holes in lateral tubing.
- Leverage claw for removing barbed products from laterals.
- Socket for gripping CETA® and PC Shrubbler® caps for disassembly.
- Includes a hole for the removal of micro spray jet caps for inspection and cleaning.

Applications

For installing micro irrigation systems by home gardeners, contractors and professionals.

Irrigation Equipment: Facts to Consider

- **Contract a professional irrigation designer; insist on a system to suit your plants and your soil.**
- **Install efficient micro-irrigation emitters wherever possible.**
- **Install an irrigation controller with multiple programs, seasonal adjustment, and a rain switch. Consider soil moisture devices.**
- **Mulch around your plants to conserve water in the soil.**
- **Irrigate to encourage deep roots - but don't over-irrigate**
- **Monitor your water use, you may need expert advice.**
- **Check and clean the various components of your system at the beginning and end of the irrigation season to make sure they are working properly.**

Filtration

It is easier to clean a single filter than many emitters. An effective filter which protects downstream components is an important feature of all irrigation systems. There are four types of filters used to protect irrigation systems:

Screen filters – typically used for relatively clean water (eg. city water) but not recommended where organics such as algae are present. They usually consist of a plastic or stainless steel screen and should be manually cleaned on a regular basis depending on the degree of clogging that has occurred.

Disc filters – these are made up of plastic discs, stacked on top of one another in the filter housing. The discs are grooved according to the rating of the filter. The grooves become gradually blocked over time with the contaminants in the water. Manual cleaning involves loosening the disc cartridge and washing the discs individually.

Sand media filters – these filters are pressurized tanks containing sand and are primarily used where organic matter content of the water is high. The dimensions of the sand grains are chosen according to the size of the emitter orifice they are intended to protect.

Sand separators – strictly speaking, these are not filters, but are devices that cause the water to be rotated in the body of the equipment. Centrifugal action forces heavier particles within the water to

move to the outside of the stream and then fall to the base of the separator where they are collected and can be removed.

In summary, screen and disc filters are commonly used to protect drippers, jets, sprayers and mini sprinklers irrigating residential gardens, and all four filter types are used in large-scale agricultural and commercial irrigation projects.

When specifying filtration requirements, it is necessary to refer to the minimum cross section dimensions of the drippers and the minimum nozzle size of jets, sprayers and mini sprinklers. The degree of filtration provided by a filter is described either in terms of the size of the holes in the screen in microns, or the number of holes per linear inch. The conversions given below are approximate.

Drip irrigation

Although variable, the dimensions of the smallest pathways in drip emitters are unlikely to be less than 0.024". If organic matter is present in the water at high levels, such an emitter will require protection by a 75 micron / 200 mesh filter. If there is only inorganic matter present, a 175 micron / 80 mesh screen will be adequate.

Jets and sprayers

Minimum orifice size is generally not less than 0.032", in which case a filter with a 100 micron / 150 mesh screen will cope with an organic load in the water. A 250 micron / 60 mesh screen will be adequate if only inorganic material is present.

Mini sprinklers

With minimum orifice size around 0.06", filter screen size can vary from 175 micron / 80 mesh (organic matter present) to 500 micron / 35 mesh (only inorganic matter present). If you are uncertain about the quality of your water supply, or the minimum orifice size of your chosen emitter, seek professional advice.

Winterization

In areas with freezing climates, winterization is needed to remove water from the irrigation system to ensure freezing and expansion of water does not damage the components. This may be accomplished by draining the system or by using compressed air to purge the system. Antelco recommends using a licensed contractor when using compressed air to purge the irrigation system before freezing occurs.

Irrigation Conversion Tables & Formulas

Mesh - Screen Filter

Mesh	Inches	Microns

USA Conditions of Sale and Limited Warranty

Antelco Corporation warrants to its trade customers that its products will be free from original defects in material and workmanship for a period of one year from date of delivery.

Within the warranty period and upon due notice and delivery of defective products to Antelco Corporation, Antelco Corporation agrees to repair or replace only product determined by Antelco to be defective. In no event shall Antelco Corporation be liable for payment of any charges or expenses other than the cost of performing its obligation to repair or replace at Antelco's sole discretion in accordance with this basic commercial warranty.

Misuse, neglect or unauthorized repairs shall void this warranty.

The warranty is expressly limited to Antelco Corporation products only.

Antelco Corporation products are for use in outdoor irrigation applications only, therefore Antelco Corporation shall not be liable for incidental or consequential damages of any nature. Antelco Corporation's sole liability shall be for the repair or replacement of defective parts at Antelco's sole discretion pursuant with this warranty.

This warranty applies only to Antelco Corporation products and expressly does not apply to any product used in conjunction with Antelco Corporation products.

Antelco Corporation makes no other warranties expressed or implied. No agent, distributor, representative, or anyone else has the authority to waive, alter, or add to the printed provisions of this warranty, to make any representation or warranty not contained herein, or to extend this warranty to anyone other than the original user. Antelco reserves the right to redesign or modify its products without incurring further liability.

Order Acceptance

We reserve the right to accept or reject any order. Possession of Antelco Corporation's catalog or price list does not constitute an offer to sell nor a right to purchase.

Credit

A signed Antelco Corporation credit application is required prior to an account being reviewed for credit approval or discount eligibility. COD may be requested for accounts with credit applications in process.

Terms

Approved credit applications will receive terms of 2% 10 days/ Net 30 days unless specified otherwise. Past due thereafter. Accounts may be placed on hold or terms revoked due to unsatisfactory payment.

Late Charges

A late charge, equal to 5% over the current Federal Reserve Bank Discount Rate, will automatically be assessed on all past due accounts.

Minimum Order

Minimum order amount is \$100.00 net. Any order not meeting \$100.00 net will be charged a \$15.00 minimum order handling fee.

Freight

Ground freight will be prepaid in the continental US on orders over \$1,500.00 net; Carrier of our choice. Freight will be prepaid and added on all orders under \$1,500.00 net.

Drop Shipments

A \$5.00 fee will be charged on all drop shipments.

Returned Merchandise

No returns accepted after 90 days or without prior approval and a Returned Goods Acceptance issued. Returned goods are subject to a 20% restocking fee. All returned shipments must be freight prepaid. Credit will not be given for obsolete or shopworn equipment. Returned products must be in re-sellable Antelco packaging. Special order items may not be returned for credit.

Delivery

Delivery estimates are made in good faith and are subject to government restrictions, failure by our suppliers to deliver, fires, strikes or other causes beyond our control.

Shortages

Claims for shortages or errors in shipping must be in writing and will not be recognized after seven days from the date of delivery.

Pricing

We reserve the right to change prices without notice. We will dispatch goods at the current price. Customers may request confirmation of current prices when ordering.

Other Conditions of Sales

The laws of Florida apply to all Antelco Corporation contracts and commercial dealings. When you deal with Antelco Corporation you will be understood to agree to that. State and local laws vary widely on the subject of commercial credit interest and late charges. The Federal Usury Preemption Law currently in effect will apply to all Antelco Corporation transactions wherever applicable.
